Our research aims to positively impact society, by informing **political decision-making** with **scientific evidence**.
We are a department of the **European Commission**.
We work closely with European research and policy organisations, agencies and institutions such as the European Parliament, and with international scientific partners, including the United Nations.

# We stand for scientific excellence

As an independent source of science and knowledge, we ensure scientific integrity and transparency.
We are committed to providing high-quality research to standards that set us to scientific excellence.

# We anticipate new challenges

Our approach is future-oriented. We look at what is coming next to be prepared for complex societal challenges, and to grasp opportunities for better-tailored policymaking.

# We connect the dots

We are no island: relying on our strong networks in policy and scientific communities, we are able to map, review, analyse and synthesise the best available evidence to support EU policies.

# At the JRC, we organise our work in portfolios

Our 25 portfolios will adapt and evolve over time in response to new priorities, challenges and opportunities to best serve policy needs.

1. Just, competitive and sustainable green transition
2. Energy solutions
3. Pathways to climate neutrality
4. Nuclear safety, technology and skills
5. Small modular reactors and innovative reactor systems
6. Future transport, mobility and related infrastructure
7. Sustainable materials and products for a circular, resilient and competitive Europe
8. Digital transformation: technologies, cybersecurity and socio-economic impact
9. Artificial intelligence and data
10. Drivers of competitiveness
11. Strategic technologies for economic security and innovative industrial ecosystems
12. Blueprints for a strong European Health Union
13. Synergies for a stronger EU in space, security and defence
14. Societal resilience, systemic disruptive events and risks: enhancing anticipation, preparedness and response
15. Science for security and law enforcement
16. Nuclear safeguards
17. Demographic resilience and effective migration strategies
18. Economic, social and territorial intelligence and impact
19. Zero pollution, biodiversity restoration and natural capital accounting
20. Transition to more resilient and sustainable food systems in an EU and global context
21. Coherent policies through Earth observation intelligence
22. Climate adaptation and water resilience
23. Innovation for democracy and public governance
24. Science for Global Gateway and neighbourhood policy, including enlargement
25. Foresight, support to science and innovative policymaking

# As a JRC employee, you will enjoy:
