Revolutionising Clinical Trials

Key Changes under the New Biotech Act

December 2025
#EU4Health #HealthUnion

SHORTENED TIMELINES

Initial authorisation	Major modifications*
75 days	64 days
47 days	**33 days**

CURRENT TIMELINE

PROPOSED NEW TIMELINE**

* For example, adding a site to conduct a clinical trial.
** These timelines assume that no additional information was needed from the sponsor.

KEY BENEFITS

Increased competitiveness for Europe on clinical trials

Lower administrative and operational **burden**

Enhanced support in the development of innovative medicines

Faster and **broader** patient **access to innovative therapies**

WHY HAVING CLINICAL TRIALS IN THE EU MATTER

EARLY ACCESS TO MEDICINES FOR PATIENTS

- **Over 10 500** clinical trials authorised between February 2022 and December 2025, to give early access to innovative treatments.
- **Millions** of people have had access to treatments thanks to their participation in clinical trials.
- **About 6 500** advanced phase trials are currently testing promising new medicines for patients.
- **Around 20%** of all trials focus on treatments for rare diseases.

STRONGER SCIENTIFIC EXCELLENCE AND SKILLS

- **Clinical trials at over 9 500 sites** across Europe are innovation hubs for the latest in cutting-edge patient care.
- Clinical trials **generate world-leading scientific knowledge**, foster innovation and technology transfer, and attract talent and investment.

MORE R&D INVESTMENT AND LOWER PUBLIC HEALTH EXPENDITURE

- Every euro invested by the pharma industry in clinical trials **results in 2 euros gained for the economy.**
- Health systems **save hundreds of millions of euro a year** thanks to payments and access to innovative medicines given through clinical trials.

STREAMLINED AUTHORISATION PROCEDURES

- **Faster initial authorisation** integrating ethical review, including for advanced therapy medicinal products (ATMPs)
- **Simplified procedures, harmonised approaches,** including for the use of mandatory templates and personal data
- **Strengthened collaboration** among Member States
- **Flexibility** for multiple major modifications to ongoing trials
- **Single assessment process for combined studies** involving the investigation of a medicine together with a medical device or an *in-vitro* diagnostic medical device
- **Risk-based approach** with proportionate and adaptive rules depending on risk level
- Improved uptake of **Artificial Intelligence** systems and **digitalisation**
- **Clinical trial sandboxes** to enable safe, controlled environment for innovative trial methodologies
